

ONSITE LAB SCREENING

Please keep in mind most of these tests are not performed in a routine physical. The appointment takes approximately 15 minutes to complete and tests are **eligible for flexible spending and health saving accounts**. All results are completely confidential and sent directly to the patient. Please email amscreening@msn.com or call 800-686-3035 for appointments.

In appreciation to employees the Comprehensive Wellness Profile (**#9 ONLY/all tests are not listed**) which consists of 54 lab tests including a full lipid panel, glucose, iron, thyroid (T4), complete blood count, liver and kidney panels is being offered this year for \$1.25 per test \$67.50.

Lab Tests Available

(1) Cardio CRP (high sensitivity C - reactive protein): A sensitive marker of systemic inflammation that has emerged as a powerful predictor of cardiovascular disease, particularly of coronary artery disease. **\$45.00**

(2) Homocysteine: Measures the level of homocysteine in the body that has been shown to contribute to several processes that cause arteriosclerosis (thickening and loss of elasticity of the arterial walls /hardening of the arteries), as well as Alzheimer's disease and blood clots. **\$45.00**

(3) Cortisol: Measures cortisol in the body that has been linked to several conditions and has been proven to be a contributor to excess body fat. **\$35.00**

(4) Fasting Plasma Glucose: Considered the gold standard for the detection of diabetes or pre-diabetes by measuring the level of glucose in a person's blood plasma after a period of fasting. **\$35.00**

(5) eGFR (estimated glomerular filtration rate): Screens for early signs of kidney disease and is considered the best clue to how well the kidneys are working. **\$35.00**

(6) Magnesium: Magnesium is responsible for over 300 biochemical reactions in the body and impacts blood pressure, metabolism, immune function and many other aspects of health. **\$35.00**

(7) Cholesterol (full lipid panel): Calculates the total cholesterol, HDL/good cholesterol, LDL/bad cholesterol, and triglycerides. *(included in the wellness profile)*. **\$35.00** if ordered separately

(8) CBC (complete blood count): Measures various components of your blood and includes screening for anemia, infection or leukemia *(included in the wellness profile)*. **\$35.00** if ordered separately.

(9) Comprehensive Wellness Profile: Consists of 50 plus screenings including full lipid panel, complete blood count, liver and kidney panels, minerals, bones, fluids, iron and electrolytes.

\$67.50 – Special Promotion pricing – ONLY INCLUDES #7 and #8 plus other test not listed

**All of above lab tests (1 - 9) plus choose one test from the list of “Additional lab tests available”
Package “A” \$255.00**

(Only one blood draw required regardless of the number of tests ordered)

ONSITE LAB SCREENING

Additional lab tests available (price listed if ordered separate from package)

- (10) **PSA (prostate specific antigen) for men only:** Aids in the detection of prostate cancer. **\$35.00**
- (11) **Hemoglobin A1C (Glycohemoglobin):** Gives a picture of the average amount of glucose in your body over a certain period and is linked to diabetes. **\$35.00**
- (12) **Rh Group and Blood Type:** Determines the type of blood a person has and Rh group. **\$35.00**
- (13) **FSH/Follicle Stimulating Hormone:** Measures the level of FSH known to be a predictor of the onset of menopause. **\$35.00**
- (14) **RA Factor:** Aids in the detection of rheumatoid arthritis. **\$35.00**
- (15) **Sickle Cell Anemia:** Screens for signs of sickle cell anemia. **\$35.00**
- (16) **Vitamin B12:** Checks the level of vitamin B12 in the blood which is linked several health issues including energy production and nervous system function. **\$35.00**
- (17) **Vitamin D:** Investigates problems related to bone metabolism or parathyroid function, possible Vitamin D deficiency or malabsorption. **\$50.00 (add \$15.00 if used as the "additional test" in package)**
- (18) **Hepatitis C:** Screens for the Hepatitis C virus which is linked to liver disease. The CDC recommends testing for adults born between 1945 to 1965. **\$40.00**
- (19) **TSH (thyroid stimulating hormone):** Aids in the detection of hyper and hypothyroidism. **\$40.00**
- (20) **Lead Level:** Checks the level of lead in the blood. **\$35.00**
- (21) **Testosterone Free and:** Checks the level of free and total testosterone. **(add \$30.00 if used as the "additional test" in package) \$65.00**
